Exotic Oils

Exotic Oils are derived from uncontrolled plantations or jungles of Asia, Africa and South – Central America.

The word exotic is used to define clearly that these crops are dependent on geographical and seasonal variations, which has an impact on their yearly production capacity.

Our selection of natural exotic oils are great to be used in the following applications:

- Anti-aging and anti-wrinkle creams
- Sun Protection Factor SPF
- Softening and hydration creams
- Skin brightening applications
- General skin care products

Internal Stabilization I.S. extends the lifecycle of the products 20-30 times as compared to conventional.

Cosmosil AND Oil

(Carapa Guaianensis Seed Oil)
