Oils

# Innovation

## Ayurvedic Beauty Care Ingredients

A selection of unique oils and butters enriched with Amla, Curcumin and Omega-3 for use in cosmetic applications.

## Ethnic Hair & Skin Care Ingredients

Specially design products to fulfill the needs of ethnic hair and skin, based on Amla, Curcumin, Omega-3 and Sesamol.

## SPF Oil & Butter

A unique and natural sun protection oil and butter with anti-microbial, antioxidant and healing effects.

## Shaving Oil & Butter

A special blend of vegetable oils, Aloe Vera extract and Rosemary, to enhance its soothing and healing properties.

# Innovation

## Cosmosil B

Revolutionary base oil formula for creams and lotions. One stop solution of highly nutritional active oils that avoids the need of various blending operations.

## Cosmodan 20

Vegetable oil based mineral oil equivalent – unique blend of vegetable oils, non-toxic, non-irritating and derived from totally renewable natural resources.

## CosmoWhite

100% vegetable oil enforced with herbal extracts from Sunflower Oil, Amla Oil, Aloe Vera and Curcumin, to treat skin pigmentation that gives glow and luminosity to your skin.

## Refined Neem Oil & Butter

A power house of actives, vitamins and essential fatty acids – now without the strong odor.

# Tailor-Made Products

We can provide you with recipe engineered lipids and tailor-made lipids for your projects and product line.

**ICSC** listen to our customers to learn their needs and desires, to ensure they receive what they need.

# Internal Stabilization Technology

International Cosmetics Science Centre (ICSC) has developed a technique to make all vegetable oils and butters highly resistant to oxidation and general degradation. This methodology stabilizes the oils and butters internally, using the natural antioxidant properties of rosemary. This unique proprietary method has been coined as “Internal Stabilization” (I.S.).

**Our internally stabilized oils and butters  
have an increased shelf life  
between 15-30 times!**

# Internal Stabilization Technology

Factors beyond our control:

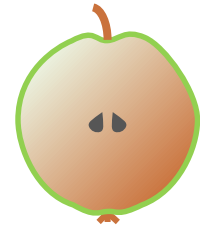

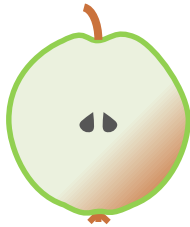

- ✓ Transportation
- ✓ Location in the store (stand level)
- ✓ Proximity to above light and heat (in the store)

Our Internal Stabilized technique also protects your product from these factors , prolonging the shelf life of your final products.

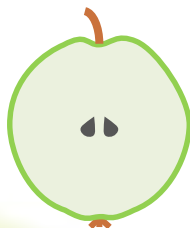

**Production**

**Final Product**

Conventional Product

Conventional Product  
**Internally Stabilized**

# Quality

We develop and deliver new products to the market based on market trends, newest research and/or customer requests.

We manufacture high quality products based on high quality raw materials for use in cosmetic applications.

To secure consistency of our supreme quality, all our products and suppliers are tested thoroughly according to our Quality Assurance Program.

Furthermore, we are internationally certified by Ecocert, Cosmos, Kosher and NOP.

# Greener Technology

All products supplied and manufactured by **ICSC** are produced through Greener Technology

This means that the following statements apply:

- ✓ All of our products are food grade and edible
- ✓ All of our products are highly suitable for vegetarians
- ✓ All our products are NON GMO
- ✓ None of our products are tested on animals
- ✓ None of our products or ingredients contain any CMR substances

# Sustainability

**ICSC** commits to a sustainable and innovative approach for its products

Our aim is to control our impact on the ecosystem throughout the life cycle of our products. We will always remain focused on the major areas of development like the selection of raw materials, green technology, and biodegradability.

# Sustainability

For many years, we have been working in close collaboration with our raw material suppliers to create more transparency in the supply chain, in order to make the path of the raw material traceable all the way from the fruit on the tree, to the manufacturing here in Denmark.

Our butters and oils are manufactured using only 100 % ethically and sustainably wild harvested, raw materials from all over the globe.

Our relationship with local harvesters enables us to be a part of immediate and measurable impact. We ensure that the people harvesting the fruits and seeds needed for our products are doing so in a sustainable and ethical way.

After the fruits and seeds are harvested, they are then transported to our center in Denmark where we start our final production.

We are also part of the Qualitree program ([www.qualitree.neri.dk](http://www.qualitree.neri.dk)) where we are continuously developing new products and redefining life in native countries.

# Research

**ICSC** is a partner of the research-based tree oil production in West Africa

QualiTree benefits local communities through the provision of new avenues for income generation and through the diversification of the available food supply, which is important both for food security and nutrition. See more at: [www.qualitree.neri.dk](http://www.qualitree.neri.dk)

# Contact Information

For more information on any of ICSC's products, please contact one of our team:
